Metric Conversions

K H D M D C M

"King Henry Didn't mind doing crazy math" or right

When moving to the left, each space is worth 10.

① Left: So, we divide by 10, for each space that we move or we move our decimal place to the left.

ex $52.34 \text{ cm} = 0.5234 \text{ m}$

② Right:

We multiply by 10, for each space that we move or

we move our decimal to the right.

ex $0.00567 \text{ km} = 5.67 \text{ m}$

ex $23 \text{ m} = 2300 \text{ cm}$
 $23,000$
