Solving Simple Equations

Find the value of x in the following equations. Show all your work in your homework cahier.

Remember we do the opposite when bringing a number or variable to the other side. An addition turns into a subtraction; a subtraction turns into an addition/
Whatever you do to one side - you do to the other!

1. $x + 3 = 8$

2. $x + 5 = 7$

3. $x - 1 = 3$

4. $x - 4 = 3$

5. $X + 6 = 18$
