

NAME: \_\_\_\_\_

Don't lose me.

Group: \_\_\_\_\_

# GEOMETRY 2

## -Constructing a triangle:

-Point looks like this

-Line: can only be measured between two points.

-Ray: an extension of a line, cannot be measured because we don't know where it stops. It \_\_\_\_\_

When we name a ray, we start with the letter from the origin!

-Segment: Just like a line, \_\_\_\_\_.

It is also the \_\_\_\_\_ from point A to point B.

**-Midpoint**

The point \_\_\_\_\_ endpoints!

**-Constructing angles:**

**-Bisecting an angle.**

**-Parallel lines:**

**-Perpendicular**

**-Bisecting a line segment with a compass.**
