# Lowest Common Multiple (LCM)

### LCM

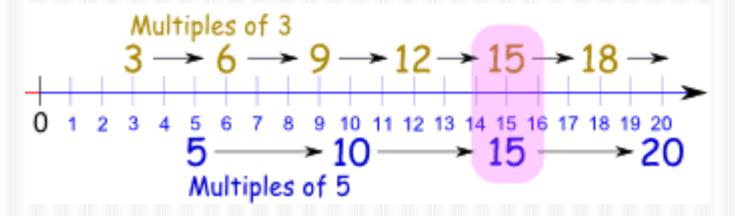

The Lowest Common Multiple of two or more numbers, is the '*smallest*' number that can be divided evenly by these numbers.

Step 1: List all the **Multiples** of each number

Step 2: Find the first **Common** (the same) Value

### Example 1

What is the LCM of 3 and 5?

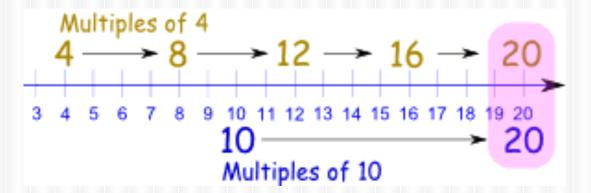

The Least Common Multiple of 3 and 5 is 15

15 is a common multiple of 3 and 5, and is the smallest (least) common multiple

## Example 2

Find the LCM between 4 and 10

So, the LCM between 4 and 10, is 20
