Translation

-Translation: geometric trans	a point, line or	
shape, along a path in a certai		
-Translations are defined by a		·
-THIS ARROW:		
A	translated point.	inal point) is the
\rightarrow A' is the	of A under the	t.
\rightarrow The path from A to A' is	to t, the	same
as t, and the same	as the arrow	w of t.

Example 1:

Step 1: Draw	a line that is				
to the	arrow going through				
point A. Use a	and a				
■ Use a	or a				
to	to measure the length of the				
	arrow and put it on your new				
line.					

- Write the length on both.
- Label your new point A'
- Remove the construction lines.

Example 2:
